

EzeeFlo ERP

Complete Multi-Tenant ERP Suite for Modern Enterprise Management

ONE PLATFORM • UNLIMITED COMPANIES • TOTAL CONTROL

UNIFIED MULTI-TENANT SYSTEM ARCHITECTURE

Multi-Tenant SaaS Architecture

Securely host and manage multiple companies on a single, isolated infrastructure.

Bank-Grade Security & Audit Trail

Detailed transaction logging with strict data privacy and encryption protocols.

Role-Based Access Control (RBAC)

Granular permissions by user, role, module, and specific company domain.

Cloud-Ready Infrastructure

Scalable, high-availability deployment ready for AWS, Azure, or private cloud.

Real-Time BI Analytics

Interactive executive dashboards providing instant multi-company operational visibility.

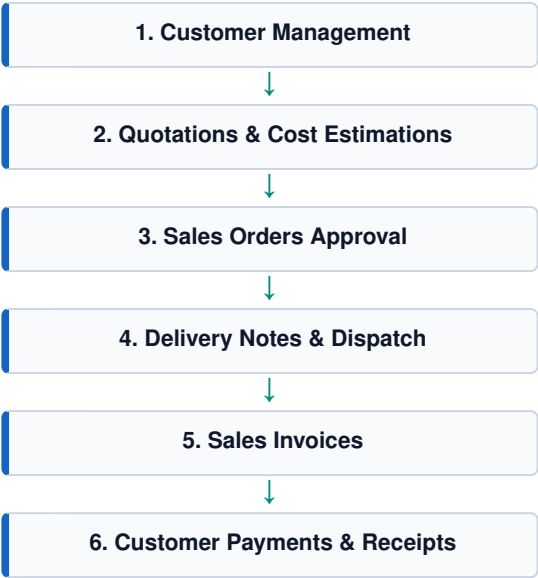

Seamless Module Integration

Integrated cross-posting between Sales, Purchase, Inventory, and General Ledger.

Sales & Purchase Management

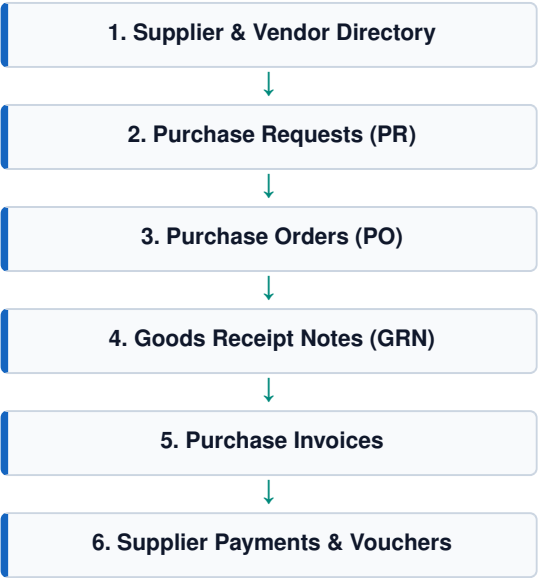

End-to-End Operational Workflows for Modern Commercial Lifecycles

SALES LIFECYCLE FLOW

- Sales Returns
- Credit Notes
- PDF Invoice Generation

PURCHASE LIFECYCLE FLOW

- Purchase Returns
- Debit Notes
- Multi-Warehouse Support

INVENTORY MANAGEMENT

- **Items & Categories:** Full SKU & category organization with built-in barcode/QR generation and scanning.
- **Multi-Warehouse Tracking:** Monitor physical stock across multiple locations and bins in real-time.
- **Transfers & Adjustments:** Streamlined inter-warehouse stock transfers, physical counts, and variance adjustments.
- **Real-Time Balances:** Immediate insight into on-hand, committed, reserved, and incoming inventory levels.
- **Stock Valuation Reports:** Structured FIFO, LIFO, and Weighted Average valuation accounting.
- **Reorder Point Alerts:** Configurable low-stock thresholds to assist inventory planning.

Accounting, Banking & Fixed Assets

Unified General Ledger with Comprehensive Audit Trails

ACCOUNTING

- **Hierarchical COA:** Multi-tiered Chart of Accounts configurable per tenant.
- **Double-Entry Journals:** Standardized manual and recurring debit/credit postings.
- **General Ledger:** Complete audit trail with full drill-down to source transactions.
- **Financial Statements:** Real-time Trial Balance, Profit & Loss, and Balance Sheet.
- **Tax & VAT Management:** Multi-region tax rules with systematic calculation & reporting.
- **Direct Postings:** Streamlined journal creation from Sales, Purchase, and POS.

BANKING

- **Multi-Bank Management:** Monitor multiple operational and currency bank accounts.
- **Bank Reconciliation:** Structured matching of bank statements against system vouchers.
- **Receipts & Vouchers:** Standardized entry for incoming and outgoing payments.
- **Cash Flow Tracking:** Real-time liquidity analytics and cash forecasting.
- **Statement Import:** Direct import support for CSV, OFX, and standard banking files.

FIXED ASSETS

- **Asset Register:** Tag capital assets with Barcode/QR identification labels.
- **5 Depreciation Models:**
 - Straight Line
 - Declining Balance
 - Double Declining (DDB)
 - Units of Production
 - Manual Schedule
- **Asset Lifecycle:** Track acquisition, transfers, revaluation, and disposal.
- **Maintenance & Insurance:** Log servicing schedules and track policy renewals.
- **Physical Audits:** Mobile scanner support for location & custodian assignment.
- **Depreciation Postings:** Scheduled depreciation posting and gain/loss calculation on sale.

Point of Sale & Enterprise Features

High-Performance Solutions Built for Retail Outlets and Cloud SaaS

POINT OF SALE (POS)

- **Multi-Terminal & User Support:** Manage unlimited counters and cashier shifts seamlessly.
- **Cash Register Sessions:** Strict open/close procedures with variance reconciliation.
- **Split Payments:** Accept combined payments (Cash, Card, Bank Transfer, Credit).
- **Parked Orders:** Hold cart sessions for fast queue management and recovery.
- **Returns & Refunds:** Instant POS return processing with inventory restocking.
- **Cash Management:** Track mid-shift Cash-In and Cash-Out adjustments.
- **POS BI Reports:** Sales analytics broken down by cashier, terminal, and category.

ENTERPRISE SAAS FEATURES

- **Super Admin Portal:** Central management suite for global platform administration.
- **Subscription Plans:** Flexible recurring billing, plans, and standard invoicing.
- **Company Provisioning:** One-click setup, suspension, and tenant configuration.
- **License Management:** Key generation, usage analytics, and limits enforcement.
- **Feature Flags:** Granular module toggle capability per tenant or plan level.
- **Complete Audit Log:** Systematic logging of every system transaction and user action.
- **Swagger API & Exports:** Open RESTful APIs alongside PDF, CSV, and Excel exports.
